Re Holvita Organic Colostrum

It is a pleasure to write in support of the Holvita Organic Colostrum. We took part in a clinical trial of this medication in a group of patients with advanced cirrhosis. We found the Holvita Colostrum to be well tolerated with a very good safety profile - no adverse events were observed in patients taking colostrum. Many patients commented on an improvement in their general well being during the study. In summary data from a small scale clinical trial indicated that Holvita Organic Colostrum is safe, even in patients with very severe underlying illness.

Yours sincerely

Graham R Foster
Professor of Hepatology
